

A NEW STANDARD FOR POINT OF USE RO

INTRODUCING THE "TITAN" BY TOPPER

THE BOTTOM LINE OF PERFORMANCE AND CONSUMER
SATISFACTION CONVERTIBLE TO A COUNTERTOP
OR UNDERSINK RO APPLIANCE

THE ENGINE DRIVING THE FUTURE OF POINT OF USE RO

OEM & DEALER BENEFITS

- Offers the industry's best value in features and performance vs. price
- Accommodates a limitless variety of proprietary designer housings
- Expresses a clean, modern appliance "look and feel"
- Ability to "morph" from countertop to undersink configuration supports try-it-before-you-buy-it sales programs
- Adaptable to a variety of distribution channels, international markets and field applications
- Ease of Undersink-to-Countertop conversion design allows minimal inventory requirements
- Extremely easy to install and service, allowing consumers to change the Sanitary Rapid-Change OEM-coded cartridges
- Water-On-Water design gives customers what they want most – the purest water, constant flow from the faucet, fast tank fill and consistent sized ice cubes
- Performs on low pressure water supplies, eliminating the need for add-on pumps and service calls
- The design accommodates a modern, ship and exchange service program

CONSUMER BENEFITS

- Option of countertop or undersink configuration — change anytime
- Compact footprint uses less countertop or undersink space
- Water-On-Water technology offers important performance benefits over conventional POU RO:
 - Produces better quality RO water
 - Produces higher RO water production — eliminates the need for pumps
 - Environment-friendly — significantly less discharge of waste water
- Constant pressure is delivered all the time to faucets, icemakers, coolers and coffeemakers
- Safe and convenient Sanitary-Rapid-Change filters offer the option of consumer-friendly maintenance
- Simplified design and construction assure minimal service and call-backs
- High flow self-cleaning membrane feature maximizes component life and minimizes cost of operation
